PROFESSIONAL SUMMARY

Computer Science student and Full-Stack Web Developer with hands-on experience building software projects across frontend, backend, databases, and AI-enabled applications. Skilled in React, Next.js, TypeScript, Laravel, PHP, SQL, and modern development workflows, with a strong academic record and continuous technical training.

EDUCATION

B.Sc. in Computer Science

Al-Aqsa University - Gaza, Palestine

2022 - Expected 2027

4th Year - GPA: 92/100

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Tailwind CSS, HTML, CSS

Backend: Laravel, PHP, REST APIs, Authentication, Authorization

Databases: MySQL, MariaDB, SQLite, Oracle Database, PL/SQL

AI, Data & MLOps: Python, pandas, scikit-learn, PyTorch, Hugging Face, TF-IDF, RAG, MLflow, DVC

Tools & Product: Git, GitHub, Figma, npm, Vite

Other Technologies: Java, JavaFX, C#, Unity, Oracle APEX

SELECTED PROJECTS

Language Center Management System

Team Leader / Full-Stack Developer - In Development

Laravel - PHP - React - Inertia.js - TypeScript - Filament

- Lead development of a full-stack language center management system built with Laravel, React, Inertia.js, TypeScript, and Filament.
- Contribute to backend development, frontend implementation, and integration between application layers.
- Worked on authentication and account-security flows, reporting functionality, and administrative workflows.

Arabic AI Travel Assistant

[GitHub Repository](#)

Developer - Completed

Python - Qwen2.5 - Hugging Face - PyTorch - Gradio - TF-IDF

- Built an Arabic-first AI travel assistant using Qwen2.5, Hugging Face Transformers, PyTorch, and Gradio.
- Combined local travel knowledge with TF-IDF retrieval to ground generated recommendations and itineraries.
- Refactored the original notebook into a modular and reproducible Python project with fallback retrieval mode.

SELECTED PROJECTS - CONTINUED

Oracle APEX Contact Management System

[GitHub Repository](#)

Developer - Completed

Oracle APEX - Oracle Database - PL/SQL - SQL

- Built a contact management application using Oracle APEX, Oracle Database, PL/SQL, and SQL.
- Implemented contact creation, detail views, interactive reporting, and server-side validation.
- Applied authentication and role-based access control for administrative and reader permissions.

BookSpace - Library Management System

[GitHub Repository](#)

Developer - Completed

Java - JavaFX - MariaDB - JDBC

- Developed a JavaFX desktop application for managing library operations with relational database integration.
- Implemented structured workflows and JDBC-based communication with MariaDB/MySQL.
- Prepared the project for reproducible setup by removing machine-specific configuration and hard-coded credentials.
